

SUV036 MICRO GSM LISTENING DEVICE

The Worlds Smallest fully integrated GSM Listening Device

The Micro GSM Listening Device is the pinnacle of GSM listening technology contained in an incredibly small unit being just 43 x 34 x 17mm. By calling the number of the inserted SIM card one is able to listen in on the surrounding conversation with extreme clarity from anywhere in the world. This clarity is achieved by using new filtering circuitry and a new DSP (Digital Sound Processor).

The size of the unit means that it can be concealed almost anywhere: in a home, office, car, handbag or briefcase. One charge will have the system ready for up to 6 days standby or 6-8 hours of quality listening. For long-term applications the unit can also be permanently connected to Mains Power.

UK customers can Track its location at any time via the internet making it a compact dual purpose surveillance device. Supplied with mains charger and protective carry case.

Features:

- Unlimited Range
- Call from any Phone and Listen immediately
- Measures just 43 x 34 x 17mm
- 6 Days Standby
- 6-8 Hours Listening Time
- Digital Sound Processor gives exceptional sound quality (10m pickup)
- Quad Band for Global Compatibility
- Can be used as a Tracking Device (UK only)

Specifications:

Dimensions:	43 x 35 x 17 mm
Power Supply:	Input 100-240V AC (auto-switching)/ Output 5V DC
Antenna:	Whip Type 4cm length
Microphone:	Ported electret-condenser with FET amplifier
Audio Processing:	Built in Digital Sound Processor
Network:	GSM 850/900/1800/1900MHz
System Control:	RISC based Microcontroller
Battery:	Internal Li-Ion Rechargeable
Battery life:	Standby 'Sleep' Mode - 6 days Call Mode – 6 hours (in average signal reception)
Weight:	40g
