SMALL CALIBRE DISRUPTOR

NSN 1385-99-978-3446

Designed to disrupt small, soft-skinned Improvised Explosive Devices (IEDs) such as letter and parcel bombs, the Small Calibre Disruptor is the smallest disruptor in the DSE range. The Low Calibre Disruptor is currently in service with the UK MoD and other international EOD teams. The Small Calibre Disruptor has seen operational service all over the world. The disruptor is a consistently proven and reliable method of bomb disruption.

- Disruptor Main Body
- Disruptor Rear Body
- Split Sleeve Adaptor
- Loading Tool
- Anti Roll Clamp
- Cleaning Brush/Rod
- Stand
- Pistons and sealing sleeves

Features:

- Manual multi-shot device is capable of repeated firings
- Can be deployed independently on a lightweight stand or remote vehicle for improved operator flexibility
- Preparation is straightforward and can be carried out remotely from the target to further enhance operator safety
- Requires minimal training and maintenance

Specifications:

- Constructed from precision-manufactured corrosion resistant materials.
- Flaw detected and proofed during manufacture
- Supplied as a complete kit housed in a robust, valise-style holdall designed to secure all parts
- The equipment is operated by bespoke cartridges which are ballistically proven to offer consistent and effective performance. Cartridges are supplied in multiples of 90 packed in an H83 ammunition container complete with internal furniture and consumable parts.
- Length: 295mm, main body diameter: 22mm, rear body diameter: 34mm, Weight: 0.875kg
